

Bitumix™ Additive

Cohesion Builder Additive for Microsurfacing Emulsion Production & Application to enhance speedy cohesion buildup, improve stability of emulsion, faster traffic opening & long lasting road performance.

Bitumix™

Bitumix™ is green innovation product of Nanotech Industries and it is used enhancement of cohesion/strength of slurry mix.

Advantages:

- Build high cohesion (accelerated cohesion) strength,
- Allows road or traffic open faster,
- Enhance stability of emulsion,
- Build consistency of slurry mix
- Allows emulsion manufacturing at higher PH (lesser addition of Hydrochloric acid) so less corrosive to Plant /Machine/Storage,
- Work as antioxidant for the slurry surface so enhance road life,
